MySQL Community Engagement Strategy

- Deliver Innovation into Community Edition
- Increase Transparency & Community Participation
- Expand and Grow the Ecosystem
  - Phased approach
    - **Phase 1:** Utilize existing tools for next release with more transparency; publish and act on roadmap, establish baseline metrics and goals
    - **Phase 2:** Increase transparency, openness, and contributions; add more and build on existing tools
    - **Phase 3:** Evaluate and Iterate
- https://blogs.oracle.com/mysql/new-era-of-mysql-community-engagement

Copyright © 2026, Oracle and/or its affiliates

Phase 1: Jan-April 2026

- Built a community-driven MySQL roadmap
- Expanded public feedback, outreach, and Contributor Summits
- Published worklogs, CVE reports, developer guides, addressed bug backlog/transparency and early access releases
- Delivered new Community Edition features in MySQL 9.7 LTS
- Defined a phased strategy for open development and ecosystem growth
- Established regular release cadence, monthly GitHub updates, and calendar versioning starting in July with MySQL 26.7

MySQL Bugs & FR Management Improvements

- Transitioning to new tools for bug reports and feature requests
- Crafting templates for bugs and feature requests to standardize input and output parameters
- Improving bug triage, transparency of status and communication of progress

Copyright © 2026, Oracle and/or its affiliates

Bug dashboard (as of Sep 23)

Open statuses: `Verified`, `Open`, `Documenting`, `Patch pending`, `Analyzing`, `In progress`, `Need Feedback`, `Patch approved`.

Closed statuses: `Duplicate`, `Closed`, `Not a Bug`, `Can't repeat`, `Won't Fix`, `No Feedback`, `Unsupported`, `Won't fix`.

Phase 2: Governance; Streamline & Improve Contributions

Phase 2: May - September 2026

Execution – increase participation and collaboration

- Quarterly Contributor Summit and Design Meetings (May and August), Early Access Releases
- 26.7 MySQL Community Edition Release (new calendar versioning) with inclusion of feature from May Contributor Summit (Percona)
- Monthly Code Releases (August, September)
- Increased transparency and participation
- Enable more community engagement features on GitHub – full contributor experience on GitHub
- Improve contribution, bug backlog and project workflows
- MySQL Governance Framework launched

Phase 2: May-September 2026

Clearer starting point for contributors

Separate paths for:

Bug reports
Bug fixes
Feature requests
Documentation Improvements
Testing and Feedback

Better visibility into status and expectations

Copyright © 2026, Oracle and/or its affiliates

Contribution Paths and Templates

I found a bug

A reproducible problem, regression, unexpected behavior, or compatibility issue that should be investigated

I want to fix a bug

A proposed code change that addresses an existing issue or improves an affected area

I want to propose/work on a new feature

A request for new or changed functionality based on a clear use case or community need

I want to improve documentation

A correction, clarification, example, or missing guidance that would help users or contributors

I want to test new functionality

Feedback from trying a release, preview build, bug fix, or new feature in a real or representative environment

Copyright © 2026, Oracle and/or its affiliates

GitHub Centered Contributions

GitHub Issues for feature requests and bug reports

GitHub Discussions for technical conversations

Pull requests for code review

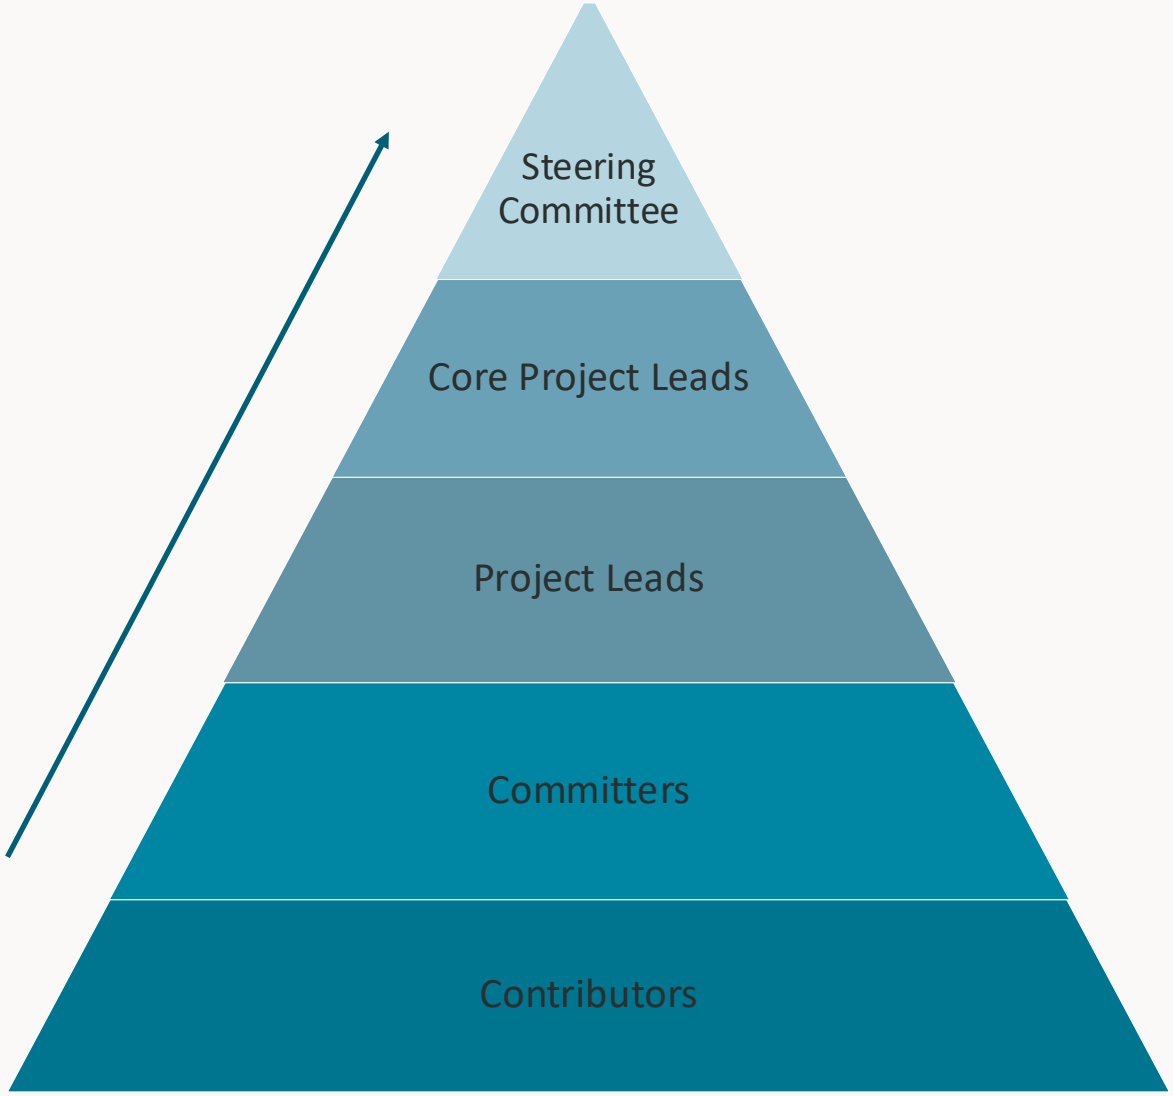

Automated checks where possible

Linked issues, PRs, design proposals, and bug records

MySQL Community Governance Framework

Security & Vulnerability Group
Coordinates vulnerability reporting, security review, and responsible disclosure.

Guiding Principles

- Open Collaboration & Innovation
- Transparent Processes
- Merit-Based Participation
- Quality, Stability & Security First

Governance creates clear pathways for participation while maintaining MySQL's quality, security, stability, and long-term success.

Inaugural Steering Committee

Pravin Mital – Amazon Web Services (AWS)

Pravin Mittal serves as Director of Engineering at Amazon Web Services (AWS), where he owns and leads all engineering efforts for Aurora and RDS open source databases. Mittal helped to launch Amazon DocumentDB and Amazon Timestream, demonstrating his expertise in building innovative database services at scale. Prior to AWS, he worked at Microsoft on SQL Server and HDInsight, bringing deep expertise in both traditional and big data database technologies. He holds an MS in Computer Science and Engineering and an MBA from the University of Washington. With his comprehensive ownership of AWS's open source database portfolio and proven track record of launching successful database services, Mittal brings valuable technical and strategic perspective to the MySQL Steering Committee, representing AWS's significant commitment to the MySQL open source ecosystem.

Jenő Szabó – Booking.com

Jenő Szabó leads site reliability and platform engineering teams at Booking.com, ensuring that application developers can easily utilize relational databases. Despite over 24 years of background in the gaming and automotive navigation industries, nothing quite prepared him for the past seven years dedicated to running MySQL on steroids in a reliable and compliant manner, all to help travelers experience the world more easily.

Alex Joseph – Google

Alex Joseph has spent 22 years working exclusively in MySQL, spanning its evolution from on-premise deployments to cloud-native services. He built MySQL expertise from the ground up at Yahoo!, ran it at gaming scale on early Cloud at Zynga, and worked on replication correctness at Facebook. At LinkedIn he launched MySQL-as-a-Service, eliminating provisioning time, plus multi-primary support with zero-downtime failovers. Since 2019 he has led Google Cloud SQL's MySQL engineering, delivering the industry's first Cloud-Scale Vector Search for MySQL. He brings both practitioner depth and engineering perspective to the challenges of database platform direction and long-term technical strategy.

Jenni Garvie – JPMorganChase

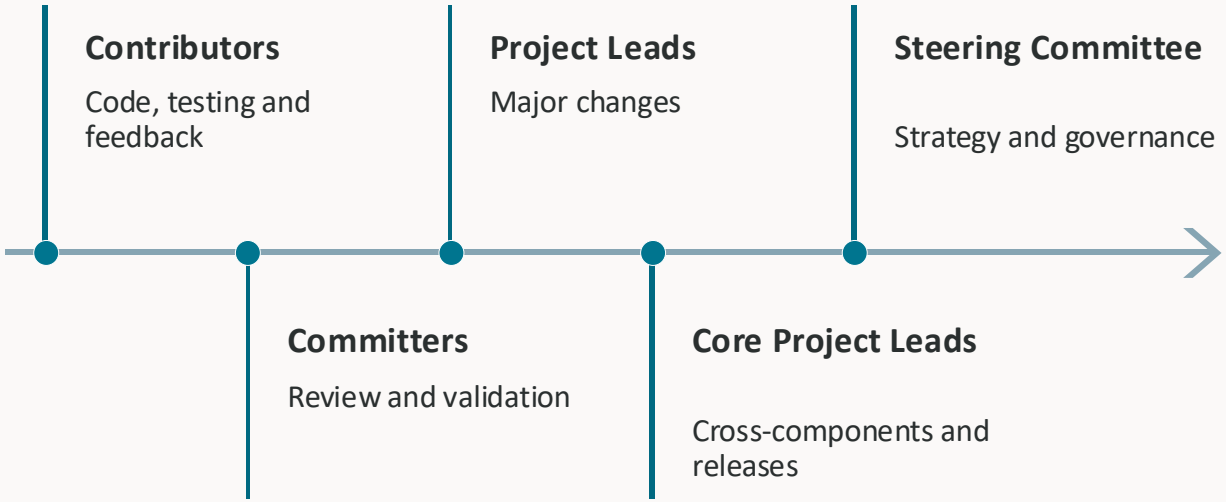

Jenni Garvie is the Executive Director at JPMorganChase with 25 years of experience across a wide range of technical disciplines and industries. She leads engineering and operations for a large-scale, managed, opinionated MySQL platform powering 2,000+ instances across the firm. Focused on building reliable, secure, and scalable database services that enable teams to deliver faster with confidence.

Community Roles

Transparent decision-making with documented contribution paths

Change / Decision Type	Primary Approval
Bug fixes and minor changes	Committers
Major subsystem changes	Project Leads
Cross-component changes	Core Project Leads
Releases	Core Project Leads
Strategic direction and governance	Steering Committee

Documented escalation paths improve transparency, accountability, and community participation.

Last week in mysql-server development (34) #134

Edit

henrikingo-oracle announced in Announcements

henrikingo-oracle 5 days ago Maintainer

edited

This is the second weekly newsletter giving you a comprehensive overview of what is going on in the MySQL open development project. This newsletter was generated with the help of an AI tool, but significant manual editing was still involved. Note that the timeframe covered really is last week, ending Sunday.

- **Repositories:** `mysql/mysql-server` and `mysql/mysql-community`
- **Date range: 2026-08-17 through 2026-08-23** inclusive.
- **Coverage:** 8 mysql-server PRs; 13 issues; 16 mysql-community Discussions.

Repository	Pull requests	Issues	Discussions
mysql/mysql-server	8	3	0
mysql/mysql-community	0	10	16

Executive Summary

1. InnoDB B+Tree Performance Optimization, Part 1 28 by **@zhao-song** sprung to life with a discussion how to phase this significant work and posting a PoC patch for review.
2. **Several new proposals in binlog and replication**: switchover observability, asynchronous crash-recovery rollback, large-transaction/DDL replication, and binlog commit optimizations. **@SongLibing** from Alibaba was active as one of his PR already is merged and several new proposals from him and other Alibaba engineers were lined up. The PR from **@wxueting-aws** is now in review, and **@HugoWenTD** posted a desingn for In-Memroy Relaylog. 684
3. **Vector indexing remained active**, and we also received a new proposal that nicely complements existing work in by @klmckeigIntegrate SVS (Vamana ANN) as a Vector Search Index Option for MySQL 116.

Merged

- Shrink NET::buff to reduce memory usage ... 714 by @SongLibing

GitHub First Development

Phase 3

Phase 3

Complete GitHub First Development

Open Development

- Design Review in PRs
- Same PR for Worklog Design & Implementation
- Public Reviews and Decisions
- PR merged to mysql/mysql-server
- Expand to Shell, Tools

GitHub

- Issues, Discussions, Projects, and PRs connected end-to-end
- Traceability from idea → implementation → release

Expanded Contributor Participation

- Same process for Oracle employees, everyone else
- Well defined committer pathway
- Community in Reviews and Feedback
- Committers will reflect the diverse of Code Contributors

Transparency & Quality

- Public CI
- Visible review outcomes
- **No compromises** on quality, stability, and security

Target: October 2026

180 degree turn for code flows across repositories.

MySQL Community Outreach

Recognition – ACE, Rockstars & Legends

Additions in February

- Rockstars:
  - Umesh Shastry
  - Marcelo Altmann
  - Matthias Crauwelts
- Legends:
  - Ronald Bradford
  - Marco Tusa

https://dev.mysql.com/community/rockstars/

MySQL Rockstars

- **Recognizes outstanding contributors:** MySQL Rockstar honors community members for impactful contributions over the past year, while MySQL Legend recognizes exceptional, long-term contributions spanning many years.

- **Values all types of contributions:** Recognition is based on community impact, including education, advocacy, blogging, speaking, and open source contributions—not just code.

- **Open nominations:** Anyone can nominate a candidate by emailing the MySQL Community Team with a brief justification. Rockstar is a lifetime title, with recipients selected by Oracle's MySQL Community Team.
  - **Please send nominations by email to Henrik.Ingo@Oracle.Com.**

Copyright © 2026, Oracle and/or its affiliates

Oracle ACE Program

- **Recognizes community leaders:** The Oracle ACE program rewards experts who make significant contributions to Oracle communities, including open source projects.
- **Provides exclusive benefits:** ACE Pro and ACE Director members receive perks such as conference passes, travel support, cloud credits, and recognition from Oracle.
- **Connects with the MySQL community:** MySQL experts can be nominated through the Oracle ACE program, and ACE Pro/Director members are automatically included in exclusive MySQL Rockstar briefings and events.
- For more info or to nominate someone, go to https://ace.oracle.com

Academics

Are you working in the academic sector, or do you have connections?

Contact us, we would love to come and deliver lectures, workshops, and hackathons .

https://dev.mysql.com/community/education/

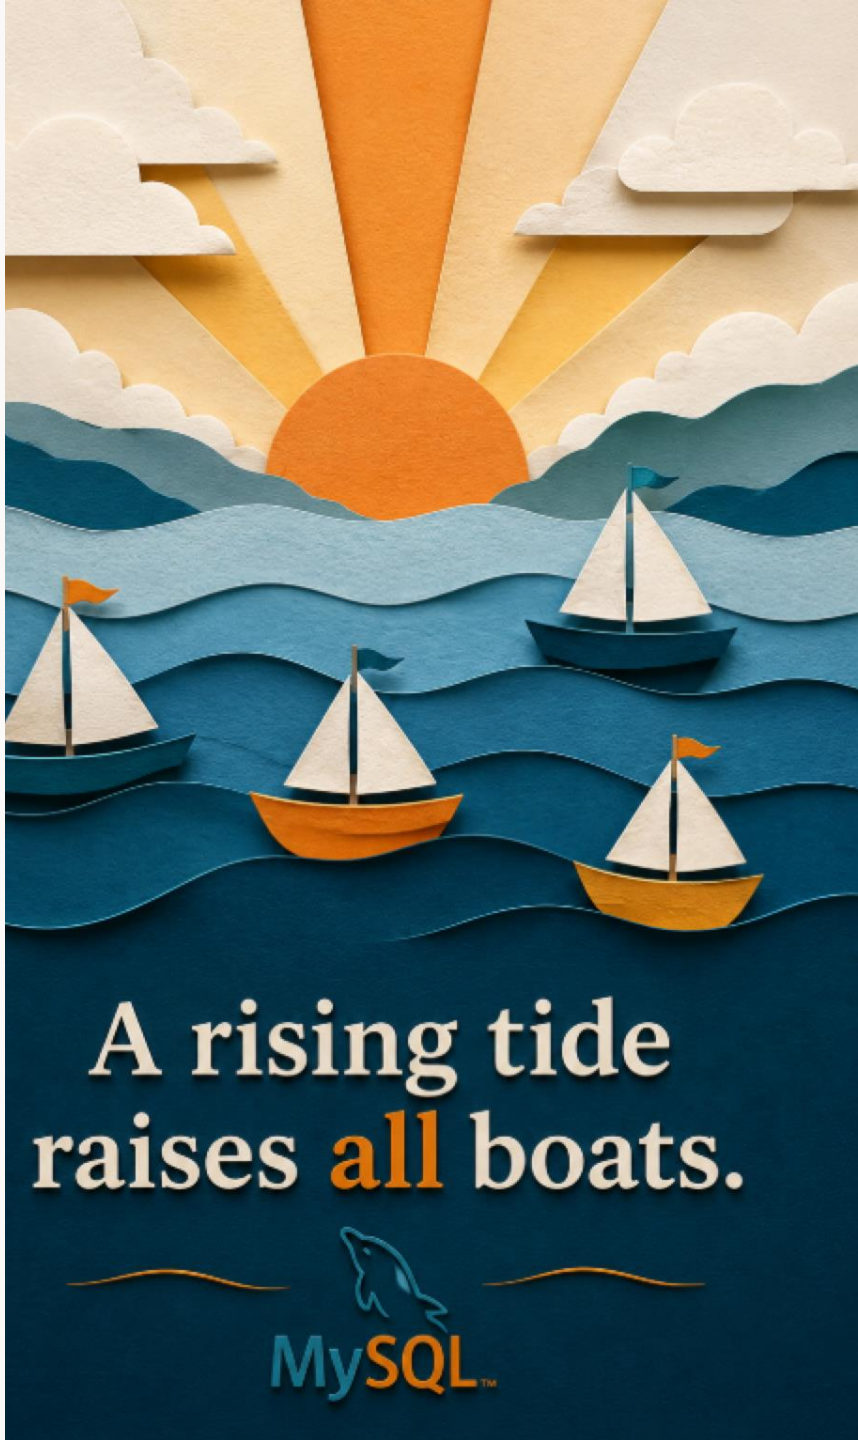

Support MUGs – create new ones, speak or attend an existing one

https://dev.mysql.com/community/mug/

When we work together…

- Ideas become actionable plans
- Proposals turn into progress
- The community grows stronger
- The ecosystem becomes better for *everyone*

What success looks like

- Contributors know where to start
- Maintainers receive more complete submissions
- Less back-and-forth during triage
- Clearer status and ownership
- Better connection between feedback, review, and implementation
- Higher-quality community collaboration

Copyright © 2026, Oracle and/or its affiliates
